

Long Range procedures

600 metre

- All shooting must be done from the 600 metre firing point only. NO shooting from down range
- Steel remains at the ground baffles 200 & 400 and at the 600 metre back stop from the firing point at the 600, **DO NOT** relocate steel targets.
- Target stands may be placed anywhere on the range floor
 - Stands positioned at the ground baffles (200 & 400) must be left in place
 - All shots must be directed at the back stop

1000 metre

- All shooting must be done from the 1000, 900 or 800 metre firing points only
- Targets may be placed anywhere down range so long as the shots are directed at the 1000 metre backstop
- If shooting is being done from the 900 or 800 metre firing points and someone wishes to use the 600 metre firing point then the shooters **MUST** come back to the 1000 metre firing point. Members must not tie up the ranges in order to shoot at the 900 & 800 metre firing points
