

## **Steel on Ranges**

Steel targets are placed on various ranges for the utilization of and enjoyment of our membership.

Process for using steel on the range:

1. **Steel is not to be moved between ranges except as authorized by the Board of Directors**
2. **SAFETY, Pistol calibre's & Rim-fire** may be utilized on any steel at any distance, **careful of splash back**
3. **SAFETY, Rifle Calibre** ammunition may only be fired at steel from 100 metres out (223 is rifle calibre although it may be chambered in a specialized pistol)
4. **SAFETY, NO steel core** ammunition or 50 centre fire calibre is to be fired at any steel. Most surplus ammunition is steel core, be careful. No steel shot to be fired at Steel targets. Steel is expensive

Shooters not following the above will be designated as not safe and / or vandalizing steel targets.
